Allowable Subject Matter

3. Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a trackball input device. Independent claims 1 and 10 identify the uniquely distinct features a pinion with multiple teeth coupled to a coding shaft to rotate as the corresponding coding shaft rotates; a deflectable member that has a first part lying between a pair of teeth, so the first member part is repeatedly deflected in first and second opposite directions, and released after each deflection, as the corresponding pinion turns in first and second opposite directions; means for generating electrical signals in response to the deflection of each of the deflectable members. Prior Art (EP 1073004A3), hereinafter ACPA, teach a pinion with multiple teeth that allows rotation in only a single direction (Yokoji et al.) or a pinion with multiple teeth that move the deflectable member in a single direction irregardless of the direction the shaft rotates (ACPA).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
